# Disclaimer Regarding Token Transactions

This document does not constitute an offer to buy or sell any tokens. PT. Berkat Indah Garment is presenting this document to gather public feedback. Any future token offerings by PT. Berkat Indah Garment (or a Simple Agreement for Future Tokens) will be conducted through official offering documents, including a disclosure document and risk factors. These official documents will contain an updated version of this whitepaper, which may vary significantly from the current version. In the event of an offering in Indonesia, it will likely be accessible only to accredited investors.

## No Guarantee of Token Development

Nothing in this document guarantees the future development of PT. Berkat Indah Garment tokens. The information presented outlines current plans, which are subject to change. The success of these tokens depends on various factors beyond PT. Berkat Indah Garment's control, including market dynamics, data-driven elements, and the global cryptocurrency landscape. Statements about future events are based on PT. Berkat Indah Garment's analytical approach described in this document, which may prove to be inaccurate. Investors are advised to exercise caution and conduct their own research before making any investment decisions related to PT. Berkat Indah Garment tokens.

## PREFACE

# Preface

In the pursuit of innovation and financial empowerment, PT. Berkas Indah Garment introduces DRX-Token, a cryptocurrency developed on the robust ETHEREUM network. This groundbreaking token embodies the core principles of speed, security, and transparency inherent in the ETHEREUM Blockchain. With a focus on the vibrant community of Indonesian sports enthusiasts, DRX-Token is designed to cater to the needs of those who are passionate about sports development and the well-being of their beloved athletes.

This document illuminates the visionary business model underpinning DRX-Token, revealing its potential to create market transparency and foster collaboration. By offering a platform where sports fans can explore new events, discover emerging athletes, and engage with businesses within its ecosystem, DRX-Token stands at the forefront of innovation in the sports industry. For stakeholders in the sports sector, this cryptocurrency presents exciting opportunities, streamlining the development of various ventures and initiatives.

Furthermore, DRX-Token serves a noble purpose as a valuable alternative investment instrument, offering financial security to athletes during their golden years. Through careful analysis and planning, PT. Berkas Indah Garment envisions a future where DRX-Token plays a pivotal role in shaping the landscape of sports and investments in Indonesia.

As we embark on this transformative journey, we emphasize the importance of transparency, accountability, and responsible investment. This document serves as a testament to our commitment to providing accurate information while highlighting the uncertainties inherent in the evolving cryptocurrency market. We urge all stakeholders and potential investors to approach this opportunity with due diligence, recognizing the dynamic nature of the cryptocurrency landscape.

Together, let us explore the boundless possibilities that DRX-Token brings, fostering a community where innovation, sports, and financial prosperity converge, ultimately shaping a brighter future for all.

03

## ABOUT DRX TOKEN

**DRX-Token is a crypto  
token built on the**

# **ETHEREUM NETWORK**

As a token built in Ethereum, DRX-Token inherits the speed, security, transparency, and other characteristics of Ethereum Blockchain. DRX-Token's main target customers are Indonesian sports fans who care about the development of sports while caring for the fate and welfare of their proud athletes. DRX itself opens up opportunities for collaboration with third parties or independent traders on cryptocurrency exchanges to help ensure the price of DRX-Token can continue to increase and is worthy of being used as an alternative investment instrument.

DRX is a utility token designed to revolutionize the sports industry by increasing fan engagement, supporting athletes, and facilitating transactions within the sports ecosystem. This token can be used for various sports, such as football, basketball, E-Sport, Parkour and others.

# Basics

DRX-Token, created by PT. Berkah Indah Garment, is a dynamic cryptocurrency operating on the Ethereum network. Unlike stable coins, DRX-Token offers a versatile value proposition, making it an attractive investment option for users seeking potential growth and market-driven value.

## DRX Key Features

- The application enables users to **engage with one another** interactively.
- Users are able to **access profiles and view the products** of other users.
- Users have the capability to **initiate the sale of their own products** within the application.
- **Seamless purchasing of products** from both DRX WEAR and other users is facilitated within the application.
- Users are promptly **informed about ongoing matches across various sports disciplines**, with information delivered in real-time or near-real-time, ensuring timely updates.

## Ethereum Network Integration

Developed on the Ethereum network, DRX-Token leverages the cutting-edge capabilities of Ethereum, one of the most advanced and widely used blockchain platforms globally. Ethereum's network ensures the security, transparency, and speed essential for seamless transactions and a robust user experience.

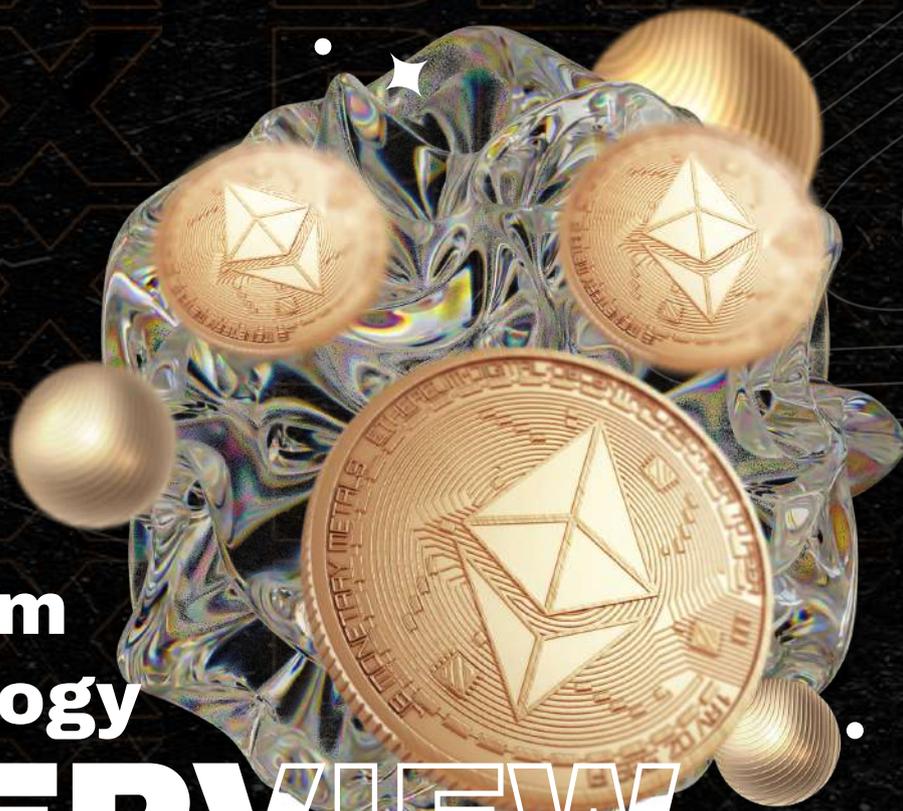

# 04

## DETAILED TECHNOLOGY AND OPERATIONS

# Ethereum Technology

# OVERVIEW

Ethereum operates on a decentralized blockchain network, enabling the execution of smart contracts and facilitating transactions using its native cryptocurrency, Ether (ETH). Ethereum utilizes a Proof of Stake (PoS) consensus mechanism for network security, transitioning from the energy-intensive Proof of Work (PoW) system employed by cryptocurrencies like Bitcoin. The Ethereum network's design promotes decentralization, security, and efficiency.

We will not attempt to explain the entire Ethereum standard on this paper because such discourse will be too long. Instead, we invite readers to read some of the following resources to learn more:

- What is ETH <https://ethereum.org/en/what-is-ethereum/>
- ETH Whitepaper <https://ethereum.org/en/whitepaper/>
- ETH API <https://ethereum.org/en/developers/docs/apis/backend/>
- ETH Repository <https://github.com/ethereum>
- ETH Explorer <https://ethereum.org/en/developers/docs/data-and-analytics/block-explorers/>

# Ethereum Token Standards

Ethereum employs various token standards that define specific rules and functionalities for tokens created on its platform. One prominent standard is ERC-20, widely used for fungible tokens, ensuring compatibility with various decentralized applications (DApps) and exchanges. ERC-721, on the other hand, is utilized for non-fungible tokens (NFTs), representing unique assets like digital art and collectibles.

## Security Measures:

### ● Cryptography

Ethereum relies on cryptographic algorithms, including SHA-3 (Secure Hash Algorithm 3), to secure transactions and maintain the integrity of the blockchain.

### ● Consensus Mechanism

Ethereum 2.0, the ongoing upgrade of the Ethereum network, implements PoS as its consensus mechanism. PoS validators are chosen based on the number of coins they hold and are willing to "stake" as collateral, reducing the energy consumption associated with mining.

### ● Smart Contracts

Ethereum's smart contracts are self-executing contracts with predefined rules and conditions. They are secured using Ethereum's cryptographic features and provide a secure way to automate various processes without the need for intermediaries.

### ● Immutability

Once transactions are confirmed and recorded on the Ethereum blockchain, they are immutable, meaning they cannot be altered or deleted. This feature ensures the integrity of the transaction history.

### ● Decentralization

Ethereum's decentralized nature ensures that no single entity or organization controls the entire network, enhancing security by eliminating single points of failure.

# Token Development and Standards:

## ERC-20 Standard

Ethereum-based tokens often adhere to the ERC-20 standard, ensuring seamless integration with Ethereum wallets, exchanges, and DApps. ERC-20 tokens are fungible, meaning they can be exchanged on a one-to-one basis.

## Smart Contract Security

Developers must adhere to best practices and conduct thorough audits to ensure the security of smart contracts. Vulnerabilities can be costly, leading to potential exploitation by malicious actors.

## ERC-721 Standard

ERC-721 tokens are used for NFTs, representing unique assets. Each ERC-721 token has a distinct value and specific attributes, making them ideal for digital art, gaming assets, and other collectibles.

05

## KEY FEATURES OF DRX-TOKEN

# Key Features of DRX TOKEN

## ● **Decentralization**

DRX-Token operates on Ethereum's decentralized network, eliminating the need for central authorities and ensuring a trustless environment for users.

## ● **Smart Contract Functionality**

Built on Ethereum, DRX-Token can utilize smart contracts, enabling automated, secure, and transparent execution of various transactions and agreements.

## ● **Interoperability**

Being part of the Ethereum ecosystem allows DRX-Token to interact seamlessly with other Ethereum-based tokens and decentralized applications (DApps), enhancing its usability and versatility.

## ● **Community Engagement**

Ethereum's vibrant developer community and ecosystem offer opportunities for continuous improvement, innovation, and collaborative development for DRX-Token.

## ● **Global Accessibility**

As an Ethereum-based token, DRX-Token enjoys global recognition and accessibility, making it accessible to a wide range of investors and users worldwide.

## ● **Potential for Growth**

Operating within the Ethereum network, DRX-Token benefits from Ethereum's evolving technology, ensuring adaptability to future advancements and potential for sustained growth in value and utility.

# Partnerships and Market Integration

PT. Berkah Indah Garment collaborates with various stakeholders, including third-party market makers and independent traders, within the Ethereum network. These collaborations facilitate liquidity, market stability, and a seamless trading experience for users of DRX-Token. Additionally, strategic branding initiatives and market education further enhance DRX-Token's acceptance and value proposition among traders and investors.

DRX-Token stands as a testament to the innovative spirit of PT. Berkah Indah Garment, harnessing the power of Blockchain to offer users a dynamic, growth-oriented cryptocurrency experience.

# 07

## USE CASE

# Business Model

By creating market transparency, DRX-Token allows sports enthusiasts to discover new events while also recognizing new athletes and businesses within its ecosystem.

- **For Sports Industry Player**

with DRX-Token, it will be easier for them to develop various business opportunities in the sports industry.

- **For Athletes**

DRX-Token can be a useful alternative investment instrument to guarantee the welfare of athletes in their old age.

08

**UTILITY**

**DRX**

# HEROES FUND

DRX Heroes Fund is a philanthropic initiative powered by the DRX token. It utilizes 0.01% of transaction fees on DEX transactions and collected into a dedicated pool. The total funds collected and their usage will be transparently displayed on the DRX token website (drxtoken.io) and across social media platforms. The DRX Heroes Fund is divided into two main categories:

## Legend Compassion Charity

- Purpose: This fund is dedicated to supporting former athletes who served the nation but now face financial hardships. The collected funds will help improve their quality of life.
- Operation: A portion of the transaction fees will be allocated to this charity to provide ongoing support to these sports legends.

## DRX Talent Development Initiative

- Purpose: The scholarship program aims to support talented children who lack financial resources to pursue their dreams in sports
- Operation: The collected funds will be distributed to football schools and other sports academies to support the education and training of these young athletes.

## Additional Benefits:

- Transparency and Accountability: The DRX Heroes Fund ensures complete transparency, with regular updates on fund collection and allocation posted on the DRX website and social media.
- Community Engagement: By participating in this initiative, DRX token holders contribute to meaningful causes, fostering a sense of community and shared purpose.

# Infinity Club: Bronze, Silver, and Gold

The DRX Membership program offers three tiers of exclusive benefits for token holders: Bronze, Silver, and Gold. Membership is based on the amount of DRX tokens held. Each tier provides unique advantages, including access to exclusive groups, events, and earning opportunities.

## Tier 1: Bronze Membership

**Requirements:** Hold a minimum \$1,000 worth of DRX Token

### Benefits unlocks:

- **Exclusive DRX Token Group Access:**
  - Join a community of like-minded DRX enthusiasts.
  - Regular updates and direct communication with the DRX team.
- **Monthly Newsletters:**
  - Receive the latest news, updates, and insights about DRX business.
- **Priority Customer Support:**
  - Faster response times for support queries.

## Tier 2: Silver Membership

**Requirements:** Hold a minimum \$5,000 worth DRX tokens

### Benefits unlocks:

- **All Bronze Benefits**
- **Exclusive DRX Party Invitations:**
  - Invitations to exclusive DRX events and parties.
- **Early Access to New Features:**
  - Get early access to new features and products before they are released to the public.
- **Exclusive Earn Opportunities:**
  - Access to special staking and earning programs with higher returns.
- **Merchandise Discounts:**
  - Discounts on DRX apparel and merchandise.

### Tier 3: Gold Membership

**Requirements:** Hold a minimum of \$50,000 DRX tokens

**Benefits unlocks:**

- **All Bronze and Silver Benefits**
- **VIP Access to DRX Events:**
  - VIP passes to all DRX-sponsored events and functions.
- **Exclusive Investment Opportunities:**
  - Access to various types of traders and financial advisors to help grow your assets.
- **Personalized Training Sessions:**
  - Personalized sports training sessions with renowned athletes and coaches.
- **Limited Edition Merchandise:**
  - Participate in decision-making processes for the allocation of the DRX Heroes Fund.

### Additional impact

- **Transparency and Security:**
  - Full transparency on fund allocation and security of your holdings.
- **Community Growth and Engagement:**
  - Opportunities to participate in community-driven initiatives and contests.
- **Philanthropic Impact:**
  - Contribute to the DRX Heroes Fund, supporting athletes and scholarships

# Gamification (Play to Earn)

**Introduction:** DRX introduces a gamified ecosystem where users can play games and earn DRX tokens as rewards. These tokens can be used within the platform and monetized externally, ensuring continuous engagement and utility for DRX tokens.

## DRX Fantasy League

**Concept:** Inspired by the Fantasy Premier League (FPL), the DRX Fantasy League allows users to create virtual teams using real-life athletes. The performance of these teams in actual matches determines the users' points and rewards.

### How It Works:

- **Team Creation:**
  - Users create their fantasy teams using DRX tokens.
  - DRX tokens are used as the "entry fee" to join leagues and contests.
- **Performance-Based Rewards:**
  - Points are awarded based on the real-life performance of the selected athletes.
  - Top performers in each league receive DRX token rewards.
- **Monetization:**
  - Earned DRX tokens can be sold for ETH or other cryptocurrencies.
  - This provides real-world value for in-game achievements.

### Benefit

- **Engagement:** Keeps users engaged with sports events and the DRX ecosystem.
- **Rewards:** Users earn tangible rewards for their strategic decisions and knowledge of sports.
- **Utility:** Increased use of DRX tokens within the platform.

## DRX Mini Games

**Concept:** DRX Mini Games are simple, engaging finger games that provide entertainment and rewards for users. These games offer points and DRX tokens based on performance.

### How It Works:

#### ● Game Play:

- Users play various mini-games using a small amount of DRX tokens as the "entry fee".
- Examples of games are penalty kicks, basketball ring games, and trivia quizz.
- It's super easy games that can be played only using thumb.

#### ● Points and Rewards:

- Points are accumulated based on the performance in each game.
- Points can be converted into DRX tokens, providing a direct incentive for gameplay.

#### ● Leaderboard and Competitions:

- Weekly and monthly leaderboards showcase top players.
- Additional DRX rewards for top performers.

### Benefit

- **Entertainment:** Provides a fun and engaging way for users to interact with the DRX platform.
- **Rewards:** Users earn DRX tokens for their performance, adding a layer of excitement and value.
- **Utility:** Encourages continuous use of DRX tokens within the ecosystem.

# SportSphere: Aggregator for Fan Tokens

**What?** The DRX token will serve as an aggregator to help football clubs and other sports organizations, including esports, to create and launch their own fan tokens. This utility will drive massive token adoption for the DRX Token project.

**Who?** Football clubs, esports teams, and other sports organizations can collaborate with DRX to create their own fan tokens. These fan tokens will be integrated with DRX apparel, similar to global fan token initiatives. The large fan bases of these clubs and teams will provide a substantial market for fan tokens.

**Why?** Using DRX tokens as the liquidity for these fan tokens will lead to widespread adoption. For example, if Club A creates a fan token with a total supply of 100 million tokens and allocates 0.5% of the supply for liquidity, priced at 100 IDR per token, approximately 4 million DRX tokens will be needed for liquidity. This will drive demand for DRX tokens, increasing their adoption and value.

**How?** Following the launch of DRX Token, the development team will create a platform to facilitate the purchase of fan tokens by sports fans. This platform will be similar to Socios.com, providing a seamless experience for fans to buy and trade tokens.

## Benefits for DRX Token:

- **Increased Use Case:** DRX tokens will be used as liquidity for fan tokens.
- **Market Expansion:** Potential collaborations with numerous sports clubs and organizations.
- **Daily Transactions:** Regular use of DRX tokens beyond just buying and selling.

## Pros:

- **Sector Penetration:** DRX tokens can enter all sports sectors.
- **Constant Activity:** DRX tokens will be used for daily transactions, enhancing liquidity.
- **Large Market:** The immense interest in sports in Indonesia and globally offers a vast potential market.
- **Token Circulation:** Approximately more supply of DRX tokens will be in circulation to support this utility.
- **Partnership Requirements:** DRX must collaborate with numerous clubs to realize this utility.

## Illustration:

### 1.Token Demand:

- 1 fan token requires approximately 4 to 10 million DRX tokens for initial liquidity.
- If 10 clubs participate, 40 to 100 million DRX tokens will be used for liquidity.

### 2.Transaction Example:

- A fan buys 1 million IDR worth of fan tokens.
- They purchase around 66,000 DRX tokens at 15 IDR each.
- These DRX tokens are then swapped for fan tokens, adding to the fan token's liquidity and potentially increasing its price.

## Detailed Calculations:

### 1.Liquidity Needs:

- Assume each club's fan token requires 4 million DRX tokens for liquidity.
- For 10 clubs, the total DRX tokens needed = 10 clubs \* 4 million DRX tokens = 40 million DRX tokens.

### 2.Fan Purchase Impact:

- If a fan spends 1 million IDR, they buy 66,000 DRX tokens ( $1,000,000 / 15 = 66,666.67$ ).
- These 66,000 DRX tokens are then swapped for the fan token, contributing to its liquidity.

### 3.Total Supply Management:

- Assume DRX's total supply is 1 billion tokens.
- Allocating 40 million tokens for 10 clubs represents 4% of the total supply.
- Regular buybacks and token burns can be implemented to manage circulating supply and maintain token value.

09

## APPS DEVELOPMENT

# Transforming SPORTS EXPERIENCES

The development of DRX SportNet Apps marks a significant step forward in our mission to revolutionize the sports industry. These apps are designed to enhance user engagement, streamline transactions, and create a vibrant community platform for sports enthusiasts. Let's dive into the progress made in bringing these innovative features to life.

## 🟡 Claim & Transfer Product

- ★ The functionality to claim and transfer products seamlessly within the DRX SportNet Apps is under active development.
- ★ Users will be able to claim their purchased products and transfer them to other users effortlessly, enhancing the flexibility and utility of DRX Token.

## 🟡 Web3 & Wallet Integration

- ★ Integration with Web3 technology and wallet connectivity is progressing smoothly.
- ★ Users will have the ability to connect their wallets to the DRX SportNet Apps, allowing them to view and manage their DRX Token holdings directly within the platform.

## ● Social Media-like Features

- ★ **Add Friends**, The 'Add Friends' feature is in the final stages of development, allowing users to connect and interact with friends within the DRX SportNet Apps.
- ★ **Blogging**, The blogging feature is being refined to enable users to share their thoughts, experiences, and insights related to sports and the DRX ecosystem.
- ★ **Live Chat**, Live chat functionality is being implemented to facilitate real-time communication between users, fostering a sense of community and camaraderie.
- ★ **API News**, Integration with API news feeds is underway, providing users with up-to-date information and updates on sports events, trends, and news.
- ★ **Payment Gateway Connect**, Development of the DRX Apps for Payment Gateway Connect is in progress, enabling seamless transactions and purchases within the platform.
- ★ **Buy Tickets and Merchandise**, Users will soon have the ability to purchase tickets and merchandise directly through the DRX SportNet Apps, enhancing convenience and accessibility.

**DRX Token Apps**

# KEY FEATURES

- The application enables users to engage with one another interactively.
- Users are able to access profiles and view the products of other users.
- Users have the capability to initiate the sale of their own products within the application.
- Seamless purchasing of products from both DRX WEAR and other users is facilitated within the application.
- Users are promptly informed about ongoing matches across various sports disciplines, with information delivered in real-time or near-real-time, ensuring timely updates.

# Token Release Schedule

## Potential Market

### ● Sports Enthusiasts and Fan Clubs

DRX can attract a large market of sports enthusiasts who are passionate about various sports disciplines such as football, basketball, e-sports, parkour, and more. These individuals may seek ways to engage more deeply with their favorite sports, athletes, and teams.

### ● Sports Organizations and Communities

DRX can cater to sports organizations, clubs, and communities looking for innovative ways to engage with their members, promote events, and offer unique experiences. This market segment includes amateur and professional sports leagues, community sports clubs, and event organizers.

### ● Athletes and Sports Personalities

DRX offers potential benefits for athletes and sports personalities by providing them with opportunities for increased visibility, fan engagement, and financial support through token-based rewards and partnerships.

# Potential MARKET

## ● **Sports Apparel and Merchandise Industry**

DRX can tap into the market of sports apparel and merchandise by offering a platform for users to buy, sell, and exchange sports-related products using DRX tokens. This market segment includes sportswear brands, merchandise retailers, and online marketplaces.

## ● **Investors and Traders**

DRX may attract investors and traders looking for alternative investment opportunities within the cryptocurrency and blockchain space. With its utility and potential for growth, DRX tokens can serve as an attractive investment instrument for those interested in the sports industry.

## ● **Blockchain and Cryptocurrency Enthusiasts**

The growing community of blockchain and cryptocurrency enthusiasts represents another potential market for DRX. These individuals may be interested in exploring innovative blockchain applications within the sports industry and participating in the DRX ecosystem.

# Roadmap

## Previous

# MILESTONE

### Phase 1

Q4 - 2023

- ★ Established the DRX Team, comprising experts in blockchain technology and the sports industry.
- ★ Conducted extensive research and data collection to inform project development.
- ★ Developed the foundational network infrastructure for DRX-Token.
- ★ Released the comprehensive whitepaper outlining the project's vision, goals, and technical details.
- ★ Designed and finalized the tokenomics model to ensure the sustainable growth and stability of DRX-Token.
- ★ DRX Apps development.

# Roadmap

## Future

# MILESTONE

### Phase 2 Q1 - 2024

- ★ Commence the development of the DRX website to serve as the central hub for project information and user interaction.
- ★ DRX apps are available on the AppStore and PlayStore (soon).
- ★ Launch a strategic social media campaign to raise awareness and engage with the community.
- ★ Initiate community-building efforts to foster a vibrant and active user base.
- ★ Secure listings on decentralized exchanges (DEX) to facilitate trading and liquidity provision.

### Phase 3 Q2 - 2024

- ★ Secure listings on centralized exchanges (CEX) to expand market reach and accessibility.
- ★ Advance the development of the DRX Platform, Implementing key features and functionalities.
- ★ Form strategic partnerships with sports organizations, businesses, and other relevant stakeholders to enhance the utility and adoption of DRX-Token.

## Phase 2

Q3 - 2024

- ★ Launch a comprehensive marketing campaign to reach a wider audience and drive adoption.
- ★ Organize community events, such as meetups and webinars, to engage with users and stakeholders directly.
- ★ Conduct a thorough audit of the project's technological infrastructure to ensure security, efficiency, and scalability.
- ★ Continuously update and refine the roadmap based on feedback from the community and evolving market conditions.

**CONCLUSION**

# Conclusion

By embracing the spirit of sports, harnessing the power of Ethereum technology, and fostering active community engagement, the creation of DRX Token heralds a new era in the realm of digital sports. Through a platform underpinned by Ethereum's cutting-edge technology, DRX empowers sports enthusiasts to participate in a transparent, secure, and innovative ecosystem.

DRX is more than just a means of transaction within the sports arena; it stands as a symbol of our dedication to community empowerment. By building a network that involves fans, athletes, and sports industry stakeholders, we establish bonds that drive positive change.

In the age of Web3, where decentralized collaboration and security take precedence, DRX emerges as a trailblazer. Through seamless integration with Ethereum technology, we open doors to boundless innovation, enabling users to explore new opportunities, build robust communities, and support the global advancement of sports.

By combining the passion for sports, the potential of Ethereum, and the active involvement of the community, DRX paves the way for a bright future for sports enthusiasts worldwide. Together, we celebrate achievements, forge connections, and inspire future generations on the journey toward a more inclusive and competitive sports world.
